The Ant and the Grasshopper

Circle Time

Have you ever seen ants walking in a line? They work tirelessly and never stop. Do you finish your work before you go out to play? Ants are tiny creatures but they can teach us a lot.

It was winter in the ant colony, and everyone was busy drying out the grains of corn which had become damp during the wet autumn weather.

A grasshopper, half dead with cold and hunger, came up to one of the ants.
"Please give me a grain or two from your store to save my life," he said faintly.
"We worked day and night to get this corn in. Why should I give it to you?"
asked the ant crossly. "What ever were you
doing all last summer when you should
have been gathering your food?"

"Oh I didn't have time for things like that," said the grasshopper. "I was far too busy singing to carry corn about."

The ant laughed unkindly. "In that case you can sing all winter too as far as I care," he said.

And without another word he turned back to his work.

Famous Quote

No one has ever become poor by giving.
