Topic: Nest of Birds

Time Limit: 30 Mins

Worksheet No. : 15

[Copy the questions following the notes and solve them on a sheet of paper date wise. Keep the worksheets ready in a file to be submitted on the opening day.]

GOOD MORNING CLASS

Today we will read about the different kinds of nests of different kinds of birds. How they make nest, why they make nest, etc. Birds build nests to lay eggs. They build nests in a place where they can keep their young ones safe and warm from predators. They use twigs, feathers, leaves, grass, threads and straw to build their nests.

NESTS OF BIRDS---Different birds make different kinds of nests in different places.

1. NEST OF OSTRICH---- Birds such as lapwings and ostriches build their nests on the ground.

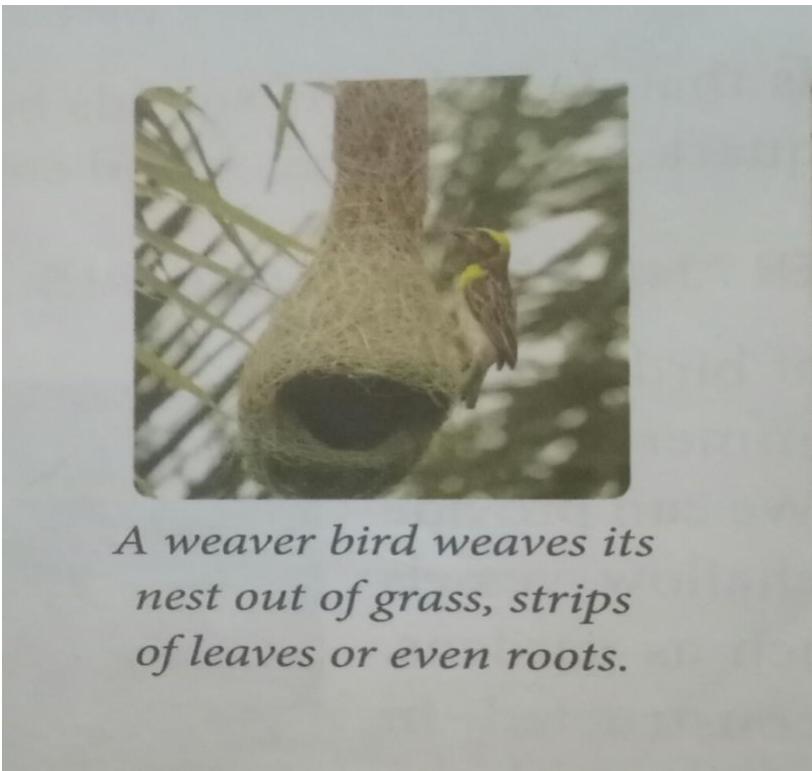

2. NEST OF TAILOR BIRD--- As the name itself suggests, this bird builds a unique nest by stitching two leaves together using spider's thread.

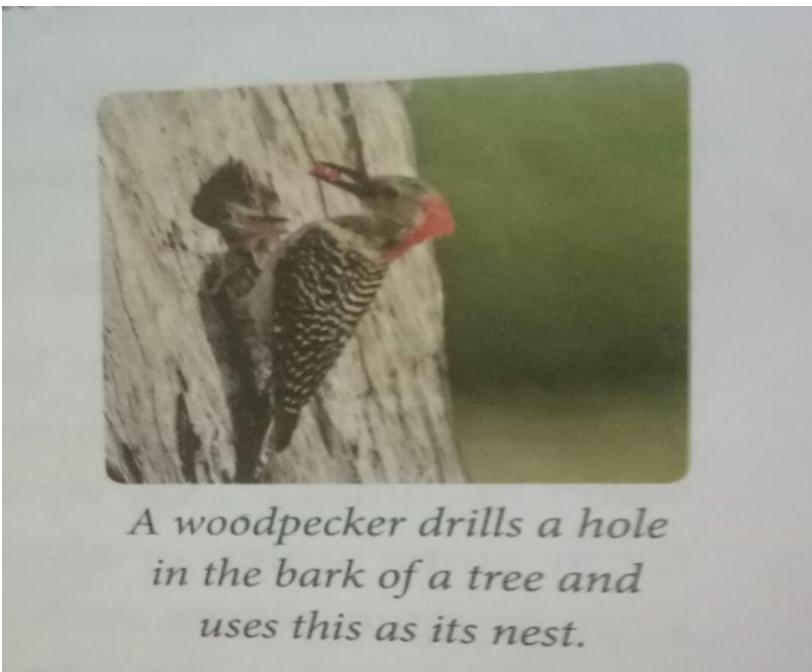

*A tailorbird makes its nest
by sewing large leaves
together.*

3. NEST OF WEAVER BIRD---This bird weaves together leaves, grasses and twigs to form a decorative nest with a tunnel-like entrance.

*A weaver bird weaves its
nest out of grass, strips
of leaves or even roots.*

4. NEST OF WOODPECKER----This bird uses it's beak to dig out holes in the bark of the trees to make it's nest.

*A woodpecker drills a hole
in the bark of a tree and
uses this as its nest.*

5. NEST OF EAGLE----This bird makes it's nest on the rocks or on the top of tall trees. The nests are called cyries.

6. NEST OF PENGUIN---These birds make their nest in the open ground with the help of stones and pebbles. They live in colonies.

7.NEST OF CROW or PIGEON----The nest of these birds is of cup-shaped and is made from twigs, grass, etc.

ASSIGNMENT

Q1. Fill ups---

- a. The bird builds its nest by stitching two leaves together.
- b. The lays only one egg at a time.

Q2. Who am I?

- a. I make my nest with a tunnel-like entrance.
- b. I make my nest in the ground with stones and pebbles.

Q3. Define the term

- a. Cyries

Q4. Give one example of a bird who makes the following nests.

- a. Nest on the top of tall trees-----
- b. Leaves stitched together-----
- c. Cup-shaped nest-----
- d. using pebbles and stones-----
