Hello, my little angels ! A very good afternoon to you all !

Hope you are fine and taking good care of your health and studies.

A warm welcome to the listening – speaking class !

Up till now, we were emphasizing upon developing a good listening skill. It's really necessary to be a good listener, but at the same time, it's equally important to be a good speaker. All of us want to express ourselves, to pour out our hearts. But we are more comfortable to express ourselves in our mother tongue. But being English medium students, you should learn to speak on a given topic, in English. Initially, you may have problems in that, you may make mistakes but do not give up as because failure is the pillar of success.

Now you will learn how to express yourselves on a given topic. First of all, you should have a clear idea about what to tell, how much to tell. Then you should know how to start, proceed and conclude it. Suppose you are asked to introduce yourselves. This introduction should contain your name, locality, information about your school and class, your family – with whom do you live, and your favourite pastime.

The following audio will give you an idea, how to introduce yourselves when you are asked to do so :-
