<table>
<thead>
<tr>
<th>Date</th>
<th>Worksheet no.</th>
<th>Chap no and Name</th>
<th>Pages no</th>
<th>Teacher 's Sign</th>
</tr>
</thead>
</table>

Now please see the Map and learn all the important names.
1. In Asia we can find two Knots (a nodal point from where all mountain ranges extend in different directions). One is Pamir Knot and another one is Armenian Knot.

2. Pamir Knot is located to the north of India.

3. Himalayas and Karakoram extend south east wards from the Pamir Knot.

4. The Kunlun and the Tien Shan ranges extend eastwards from Pamir Knot.

5. The Tien Shan is continued by the Altai and Yablonovy Ranges.

6. In this portion we can find intermontane plateaus (Plateau of Tibet known as Roof of World lies between Himalayas and Kunlun Ranges)

**Notes::: when a plateau is located between two young fold mountain called intermontane plateau**

7. We can also find Gobi desert and Tarim basin in this Highlands.

Now please answer the following questions. (2×5=10)

a. Define the term intermontane plateau.
b. Give one example of intermontane plateau.
c. Which is the largest desert in Asia?
d. What do you mean by the term Knot? Give one example.
e. Write two special features of Central Highlands.
