

CLASS – III.

DATE : 01/02/21

SUBJECT – ENGLISH I (LANGUAGE)

TOPIC – COMPREHENSION AND PICTURE COMPOSITION

Hello! Dear children !

You may be surprised to get this worksheet, though you are having regular classes ! For your kind information, there has been a little bit change in your English I (language) syllabus. In addition to the topics, mentioned in the syllabus, there will be comprehension and picture composition also. Please take a note of the same. As we have limited Eng I classes and have to cover a number of topics , so we will be practising picture composition through this type of worksheets. And so far the question of comprehension is concerned, you had practised a number of comprehension through the worksheets, sent earlier and through the online classes also. Practise more comprehension at home.

Picture composition :- Children, let's now learn what is picture composition ! Picture composition is nothing but to describe a given picture. You are supposed to describe the picture within the number of sentences as will be mentioned. You are supposed to describe the picture in present tense. Try to cover every detail of the picture in the said number of sentences. You will not write anything which is not there in the picture. Let's practice a picture composition which will make you more familiar with the same.

Look at the picture below and study that :-

Let's describe this picture in 5 sentences.

How will we do it ? Let's see...

This picture shows a scene of a park.

So we can write that ' In this picture, there is a park where there are many children. The children are playing and riding different rides. There is also a man and a woman, who are sitting on a bench and talking to each other. A boy and a girl are playing football, a girl is skipping alone, three children are riding the slide, and there are also two children who are riding see-saw. There are many colorful flowers as well, in the park and the place seems to be full of fun.

In this way, we have to do picture composition. First notice carefully what are there in the picture and then carry on describing them, one by one.

Hope, children, you have got an idea how to do picture composition ! Practice it.

Here's another picture for your practice. Study it carefully and write a composition, based on it, within 5 sentences, in your composition note book. This is your home work and it will be discussed on coming Wednesday. So complete the homework by coming Wednesday.
